

P.V.C. BRAIDED HOSE (PVC TUBE)

Product Description

Clear, flexible PVC hose reinforced with open mesh nylon braid. Manufactured from FDA approved PVC resins. Non-conductive and suitable for general purpose air, water, mild chemicals, plating solutions, and saltwater.

Features

- Transparent for easy blockage detection
- Lightweight and flexible
- Reinforced for higher working pressures
- Non-conductive
- Phthalate-free

Temperature Range

–5°F to +160°F
–21°C to +71°C

Applications

- Air and water transfer
- Light hydrocarbons
- Solutions containing mild salts or plating chemicals

Fittings

- Hose Barbs

CERTIFIED UNDER NSF/ANSI STANDARD 51

NOTE

The working pressures listed for the PVC hose are rated at +70°F (+21°C). Any ambient or internal increase in temperature will lower the listed working pressures. This hose is not recommended for milk contact, alcohol (liquor), or medical applications.
